This book provides a state of the art summary on the general theme of descriptive multivariate analysis It consists of a collection of commissioned edited articles by an international group of leading researchers Phipps Arabie Rutgers University writes on Clustering from the Perspective of Combinatorial Data Analysis Bernard Flury Indiana University includes some highly novel and previously unpublished work in Principal Component Models for Patterned Covaria It fills a gap left by standard textbooks on multivariate analysis which understandably contain only basic ideas and techniques As such it would provide useful supplemental material for a graduate level course Technometrics this vo
