10 of 10 review helpful Be At One With The Topological Cosmos By Joseph Montgomery I used this textbook to supplement Dr Cain s notes in a topology class at Georgia Tech I found it to be an excellent introduction to the subject Theorems are proved with clarity and the exercises inspire thought about the subject matter This book was the first place I encountered a proof of the Tychonoff Product Theorem The proof was Coverage is fairly standard for a general topology course Intended primarily for an undergraduate course DLC Topology
