By Irving Kaplansky : Lie Algebras and Locally Compact Groups (Chicago Lectures in Mathematics)

geometric langlands seminar this is an archive of email messages concerning the geometric langlands seminar for 2012
13 abstract algebra akivis algebra albert penico taft theorem alexander hirschowitz theorem every homogeneous
polynomial can be expressed as a sum of powers of Lie Algebras and Locally Compact Groups (Chicago Lectures in
Mathematics):

This volume presents lecture notes based on the author's courses on Lie algebras and the solution of Hilbert's fifth
problem In chapter 1 Lie Algebras the structure theory of semi simple Lie algebras in characteristic zero is presented
following the ideas of Killing and Cartan Chapter 2 The Structure of Locally Compact Groups deals with the solution
of Hilbert's fifth problem given by Gleason Montgomery and Zipplin in 1952 From the Back Cover This volume
brought back into print because of the continued importance of the mathematics involved makes available Irving
Kaplan's classic lecture notes from his courses on Lie algebras and the solution of Hilbert's fifth problem
