From Claude Bardos : Instability in Models Connected with Fluid Flows I (International Mathematical Series, Vol. 6) (No. 1) vol7 no3 may 2004 mathematical and natural sciences study on bilinear scheme and application to three dimensional convective equation itaru hataue and yosuke lattice boltzmann methods lbm or thermal lattice boltzmann methods tlbm is a class of computational fluid dynamics cfd methods for fluid simulation Instability in Models Connected with Fluid Flows I (International Mathematical Series, Vol. 6) (No. 1):

In this authoritative and comprehensive volume Claude Bardos and Andrei Fursikov have drawn together an impressive array of international contributors to present important recent results and perspectives in this area The main subjects that appear here relate largely to mathematical aspects of the theory but some novel schemes used in applied mathematics are also presented Various topics from control theory including Navier Stokes equations are covered From the Back Cover Instability in Models Connected with Fluid Flows I presents chapters from world renowned specialists The stability of mathematical models simulating physical processes is discussed in topics on control theory first order linear and nonlinear
