From Claude Bardos : Instability in Models Connected with Fluid Flows II (International Mathematical Series, Vol. 7) (No. 2) vol7 no3 may 2004 mathematical and natural sciences study on bilinear scheme and application to three dimensional convective equation itaru hataue and yosuke introduction heavy oil is defined as liquid petroleum of less than 20api gravity or more than 200 cp viscosity at reservoir conditions no explicit differentiation Instability in Models Connected with Fluid Flows II (International Mathematical Series, Vol. 7) (No. 2):

This is a unique collection of papers all written by leading specialists that presents the most recent results and advances in stability theory as it relates to fluid flows The stability property is of great interest for researchers in many fields including mathematical analysis theory of partial differential equations optimal control numerical analysis and fluid mechanics This text will be essential reading for many researchers working in these fields From the Back Cover Instability in Models Connected with Fluid Flows II presents chapters from world renowned specialists The stability of mathematical models simulating physical processes is discussed in topics on control theory first order linear and nonlin
