By Antonio Mucherino, Petraq Papajorgji, Panos M. Pardalos : Data Mining in Agriculture (Springer Optimization and Its Applications) a geographic information system gis is a system designed to capture store

manipulate analyze manage and present spatial or geographic data providing researchers with access to millions of scientific documents from journals books series protocols and reference works Data Mining in Agriculture (Springer Optimization and Its Applications):

Data Mining in Agriculture represents a comprehensive effort to provide graduate students and researchers with an analytical text on data mining techniques applied to agriculture and environmental related fields This book presents both theoretical and practical insights with a focus on presenting the context of each data mining technique rather intuitively with ample concrete examples represented graphically and with algorithms written in MATLAB reg From the reviews ldquo This book covers several topics in data mining within the context of agriculture hellip Every problem at the end of each chapter is provided with solutions hellip who are looking for a first step into the field of data mining i
