By Charles Li, Stephen Wiggins : Invariant Manifolds and Fibrations for Perturbed Nonlinear Schrödinger Equations (Applied Mathematical Sciences) for perturbed nonlinear schr dinger equations 1st invariant manifolds

and fibrations for perturbed nonlinear schrödinger equations applied mathematical sciences invariant manifolds and their fibrations for perturbed nonlinear schrödinger equation 21 the setting for the perturbed nonlinear schrödinger equation 17 Invariant Manifolds and Fibrations for Perturbed Nonlinear Schrödinger Equations (Applied Mathematical Sciences):

In this monograph the authors present detailed and pedagogic proofs of persistence theorems for normally hyperbolic invariant manifolds and their stable and unstable manifolds for classes of perturbations of the NLS equation as well as for the existence and persistence of fibrations of these invariant manifolds Their techniques are based on an infinite dimensional generalisation of the graph transform and can be viewed as an infinite dimensional generalisation of Fenic
