From Springer : Multiple-Time-Scale Dynamical Systems (The IMA Volumes in Mathematics and its Applications)

sparse coding that is modelling data vectors as sparse linear combinations of basis elements is widely used in machine learning neuroscience signal processing type or paste a doi name into the text box click go your browser will take you to a web page url associated with that doi name send questions or comments to doi Multiple-Time-Scale Dynamical Systems (The IMA Volumes in Mathematics and its Applications):

Systems with sub processes evolving on many different time scales are ubiquitous in applications chemical reactions electro optical and neuro biological systems to name just a few This volume contains papers that expose the state of the art in mathematical techniques for analyzing such systems Recently developed geometric ideas are highlighted in this work that includes a theory of relaxation oscillation phenomena in higher dimensional phase spaces Subtle exponenti
