astronomical and Astronomy and Astrophysics in the New Millennium:

In this new book a distinguished panel makes recommendations for the nation's programs in astronomy and astrophysics including a number of new initiatives for observing the universe. With the goal of optimum value the recommendations address the role of federal research agencies, allocation of funding, training for scientists, competition and collaboration among space facilities and much more. The book identifies the most pressing science questions and ex. About the Author: Astronomy and Astrophysics Survey Committee, Board on Physics and Astronomy, Space Studies Board, National Research Council.
