By National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Planning a Global Library of the Mathematical Sciences : Developing a 21st Century Global Library for Mathematics Research

how do you define 21st century learning one question eleven answers a comprehensive and coherent set of mathematics standards for each and every student from prekindergarten through grade 12 principles and standards is the first set Developing a 21st Century Global Library for Mathematics Research:

Like most areas of scholarship mathematics is a cumulative discipline new research is reliant on well organized and well curated literature Because of the precise definitions and structures within mathematics today s information technologies and machine learning tools provide an opportunity to further organize and enhance discoverability of the mathematics literature in new ways with the potential to significantly facilitate mathematics research and learning Opp
