General Topology (North-Holland Mathematical Library):

This classic work has been fundamentally revised to take account of recent developments in general topology The first three chapters remain unchanged except for numerous minor corrections and additional exercises but chapters IV VII and the new chapter VIII cover the rapid changes that have occurred since 1968 when the first edition appeared The reader will find many new topics in chapters IV VIII e g theory of Wallmann Shanin s compactification realcompact a distinguished book by a distinguished mathematician The book is both a literate treatment by a world class topologist of significant portions of Modern General Topology and a personal judgemental statement as to what does and what does not deserve to be
