By Kelvin Lancaster : Mathematical Economics (Dover Books on Computer Science) quot;altogether a most instructive entertaining and esthetically pleasing bookquot; science since the ancient greeks the modern science made easy by one of the leading physicists of the twentieth century george gamows one two Mathematical Economics

(Dover Books on Computer Science):

An excellent book which should find wide use in Mathematics Reviews. In this classic volume a noted economist and teacher has combined a modern text for graduate courses in mathematical economics with a valuable reference book of analytical economics for professional economists. Unique in its unified and careful presentation of a variety of techniques of economic analysis, the book is divided into two parts: chapters on mathematical economics and
