By T. G. Room : A Background to Geometry: Natural, Synthetic and Algebraic mcmicken mathematics requirements all 1000 and 2000 level courses will partially satisfy the quantitative reasoning qr gen ed requirement of the college of arts allstar teacher resource guide this section was developed just for teachers here you will find specific curriculum objectives correlated to national science A Background to Geometry: Natural, Synthetic and Algebraic:

The central theme of the book is the development of the idea of congruence that relation between geometric figures which is basic to ordinary Euclidean geometry The text is divided into four books corresponding to stages in the development of a geometrical system from simple axioms 1 Geometry without numbers the relations of order and sense 2 Geometry and counting properties of the systems obtained by repetitions of the operation of displacement 3 Geometry
