Homotopy Theory of Higher Categories: From Segal Categories to n-Categories and Beyond (New Mathematical Monographs):

The study of higher categories is attracting growing interest for its many applications in topology algebraic geometry mathematical physics and category theory In this highly readable book Carlos Simpson develops a full set of homotopical algebra techniques and proposes a working theory of higher categories Starting with a cohesive overview of the many different approaches currently used by researchers the author proceeds with a detailed exposition of one of the mo About the Author Carlos Simpson is Directeur de Recherche in the CNRS in Toulouse and Nice France
