By James C. Robinson : Dimensions, Embeddings, and Attractors (Cambridge Tracts in Mathematics)
Dimensions, Embeddings, and Attractors (Cambridge Tracts in Mathematics):

This accessible research monograph investigates how finite dimensional sets can be embedded into finite dimensional Euclidean spaces The first part brings together a number of abstract embedding results and provides a unified treatment of four definitions of dimension that arise in disparate fields Lebesgue covering dimension from classical dimension theory Hausdorff dimension from geometric measure theory upper box counting dimension from dynamical systems About the Author James C Robinson is Professor of Mathematics at Warwick University
