odonnell mb phd vol7 no3 may 2004 mathematical and natural sciences study on bilinear scheme and application to three dimensional convective equation itaru hataue and yosuke Spline Regression Models (Quantitative Applications in the Social Sciences) (v. 137):

Spline Regression Models shows the nuts and bolts of using dummy variables to formulate and estimate various spline regression models For some researchers this will involve situations where the number and location of the spline knots are known in advance while others will need to determine the number and location of spline knots as part of the estimation process Through the use of a number of straightforward examples the authors will show readers how to wor
