By Sorin G. Gal : Shape-Preserving Approximation by Real and Complex Polynomials series phd colloquium title approximation algorithms for geometric packing and covering problems speaker mr aniket basu roy some

architects herald the adoption of freeform curvilinear design and the utilization of computer aided manufacturing as cutting edge or even avant garde while it Shape-Preserving Approximation by Real and Complex Polynomials:

First comprehensive treatment in book form of shape preserving approximation by real or complex polynomials in one or several variables Of nbsp interest to nbsp grad students and researchers in nbsp approximation theory mathematical analysis numerical analysis Computer Aided Geometric Design robotics data fitting chemistry fluid mechanics and engineering Contains many open problems to spur future research Rich and updated bibliography From the reviews This monograph is a rich collection of existing and new results in an important part of approximation theory in which the object of approximation and the instrument for approximation share the same shape characteristics hellip This is
