By Solomon Lefschetz : Topology (Colloquium Publications) download and read topology of manifolds colloquium publications amer mathematical society volume 32 nrf bursary application topology colloquium publications a book by solomon lefschetz Topology (Colloquium Publications):

Lefschetz's Topology was written in the period in between the beginning of topology by Poincaré and the establishment of algebraic topology as a well formed subject separate from point set or geometric topology. At this time Lefschetz had already proved his first fixed point theorems. In some sense the present book is a description of the broad subject of topology into which Lefschetz's theory of fixed points fits. Lefschetz takes the opportunity to describe some of
