From Brand: Amer Mathematical Society : Canonical Sobolev Projections of Weak Type (1,1) (Memoirs of the American Mathematical Society) Canonical Sobolev Projections of Weak Type (1,1) (Memoirs of the American

Mathematical Society):

Let S be a second order smoothness in the \mathbb{R}^n setting. We can assume without loss of generality that the dimension n has been adjusted as necessary so as to insure that S is also non degenerate. We describe how S must fit into one of three mutually exclusive cases and in each of these cases we characterize by a simple intrinsic condition the second order smoothnesses S whose canonical Sobolev projection P_S is
