By Albert Marden : Hyperbolic Manifolds: An Introduction in 2 and 3 Dimensions papers in progress and submission preprints hyperbolic 3 manifolds tameness and ahlfors measure conjecture; lecture notes from a minicourse at the ium during wilhelm schlag department of mathematics university of chicago 5734 south university avenue chicago il 60637 office phone 773 702 7390 fax 773 702 9787 Hyperbolic Manifolds: An Introduction in 2 and 3 Dimensions:

Over the past three decades there has been a total revolution in the classic branch of mathematics called 3 dimensional topology namely the discovery that most solid 3 dimensional shapes are hyperbolic 3 manifolds This book introduces and explains hyperbolic geometry and hyperbolic 3 and 2 dimensional manifolds in the first two chapters and then goes on to develop the subject The author discusses the profound discoveries of the astonishing features of these 3 manifol About the Author Albert Marden is a Professor of Mathematics at the University of Minnesota
