By Federico Gobbo, Marco Benini : Constructive Adpositional Grammars: Foundations of Constructive Linguistics Constructive Adpositional Grammars: Foundations of Constructive Linguistics:

This book presents a new paradigm of natural language grammar analysis based on adposition as the key concept considered a general connection between two morphemes or group of morphemes The adpositional paradigm

considers the morpheme as the basic unit to represent morphosyntax taken as a whole in terms of constructions while semantics and pragmatics are treated accordingly All linguistic observations within the book can be described through the methods and tools About the Author Federico Gobbo holds a doctorate in Computer Science specializing in Computational Linguistics from the University of Insubria Varese Como Italy where he is currently a member of the Research Center Informatica Interattiva CRII For thr
