By Benjamin Fine, Gerhard Rosenberger : The Fundamental Theorem of Algebra (Undergraduate Texts in Mathematics)

references silverman joseph h; tate john torrence 1992 rational points on elliptic curves undergraduate texts in mathematics springer isbn 978 387 97825 3 this site is intended as a resource for university students in the mathematical sciences books are recommended on the basis of The Fundamental Theorem of Algebra (Undergraduate Texts in Mathematics):

The fundamental theorem of algebra states that any complex polynomial must have a complex root This book examines three pairs of proofs of the theorem from three different areas of mathematics abstract algebra complex analysis and topology The first proof in each pair is fairly straightforward and depends only on what could be considered elementary mathematics However each of these first proofs leads to more general results from which the fundamental theorem can be
