**By Anant R. Shastri : Basic Algebraic Topology** what is topology a short and idiosyncratic answer robert bruner basically topology is the modern version of geometry the study of all different sorts of spaces looking for books on basic algebra check our section of free e books and guides on basic algebra now this page contains list of freely available e books online Basic Algebraic Topology:

Building on rudimentary knowledge of real analysis point set topology and basic algebra Basic Algebraic Topology

provides plenty of material for a two semester course in algebraic topology The book first introduces the necessary fundamental concepts such as relative homotopy fibrations and cofibrations category theory cell complexes and simplicial complexes It then focuses on the fundamental group covering spaces and element hellip a good graduate text the book is well written and there are many well chosen examples and a decent number of exercises It meets its ambitious goals and should succeed in leading a lot of solid graduate students as well as working mathematicians f
