By nist : Surface Color definition of surface color 1a the color ascribed to an opaque substance or object b a color extending no farther than the surface 2 color determined by selective reflection mars surface color the surface of the planet mars appears reddish from a distance because of rusty dust suspended in the atmosphere from closeup it looks more of a butterscotch and other common surface colors include golden brown tan and greenish depending on minerals Surface Color:

This document SP250 71 2007 NIST Measurements Services 0 45 Surface Color describes the instrumentation standards and techniques used to measure the surface color of reflective non fluorescent materials at a 0 45 geometry that is an irradiance angle of 0 deg and measuring angle of 45 deg The organization of this document is as follows

Section 1 describes the motivation for establishing a 0 45 Reflectometer and associated calibration services that are availa
