1998 (AIP Conference Proceedings) (v. 2):

The conference addressed professionals in different areas of theoretical physics. Highlights were last developments in string theory particularly the connection AdS/CFT was discussed. The conjecture was exposed by Maldacena and his original work is reprinted in this volume. The well honored Chern-Simons Theory was carefully presented as well as the uses of zeta function methods in physics and mathematics. Also discussed were gravitation and cosmology models. Additio
