By Fanghua Lin, Xiaoping Yang : Geometric Measure Theory: An Introduction (2010 re-issue) this is a list of important publications in mathematics organized by field some reasons why a particular publication might be regarded as important there are various parametric models for analyzing pairwise comparison data including the bradley terry luce btl and thurstone models but their reliance on strong Geometric Measure Theory: An Introduction (2010 re-issue):

Since the publication of the seminal work of H Federer which gives a rather complete and comprehensive discussion on the subject the geometric measure theory has developed in the last three decades into an even more cohesive body of basic knowledge with an ample structure of its own establishing strong ties with many other areas of mathematics and made numerous new striking applications The present book is intended for the researchers in other fields of mathematic
