By Do Ngoc Diep : Methods of Noncommutative Geometry for Group C^* -Algebras (Chapman & Hall/CRC Research Notes in Mathematics Series)

Methods of Noncommutative Geometry for Group C^* -Algebras (Chapman & Hall/CRC Research Notes in Mathematics Series):

The description of the structure of group C algebras is a difficult problem but relevant to important new developments in mathematics such as non commutative geometry and quantum groups Although a significant number of new methods and results have been obtained until now they have not been available in book form This volume provides an introduction to and presents research on the study of group C algebras suitable for all levels of readers from graduate stud
