By Lev B. Klebanov, Svetlozar T. Rachev, Frank J. Fabozzi : Robust and Non-Robust Models in Statistics there are various parametric models for analyzing pairwise comparison data including the bradley terry luce btl and thurstone models but their reliance on strong how can the standard errors with the vcecluster clustvar option be smaller than those without the vcecluster clustvar option Robust and Non-Robust Models in Statistics:

In this book the authors consider so called ill posed problems and stability in statistics The objective of the authors of this book is to identify statistical problems of this type find their stable variant and propose alternative versions of numerous theorems in mathematical statistics
