**From Brand: Nova Science Pub Inc : Evolution Equations (Mathematics Research Developments)** faculty research interests lszl babai i work in the fields of theoretical computer science and discrete mathematics; more specifically in computational mathematics undergraduate program graduate program faculty all courses faculty listings

and curricular and degree requirements described herein are Evolution Equations (Mathematics Research Developments):

This book presents topical research in the study of evolution equations Topics discussed include understanding the theory of noisy dynamical systems in Markovian and non Markovian settings using evolution equations Einstein s evolution equation for fluid with exponential free paths distribution a theorem on the optical cubic quintic Schrodinger equation methods for solving non linear partial differential equations based on Riccati equations homogeneous and non linea
