From Nova Science Publishers : Cellular Automata (Mathematics Research Developments) hb 350pp 2008
atfomenko and asmishchenko moscow state university russia this volume is intended for graduate and research students in mathematics and featured book a comprehensive guide through the italian database research over the last 25 years published 2018 new books and journals are available every day Cellular Automata (Mathematics Research

Developments):

A cellular automaton is a discrete model studied in computability theory mathematics physics complexity science theoretical biology and microstructure modelling It consists of a regular grid of cells each in one of a finite number of states such as On or Off The grid can be in any finite number of dimensions For each cell a set of cells called its neighbourhood usually including the cell itself is defined relative to the specified cell This book presents
