From Nova Science Pub Inc : Lyapunov Stability of Non-Autonomous Dynamical Systems (Mathematics Research Developments)

systems theory or systems science is the interdisciplinary study of systems a system is an entity with interrelated and interdependent parts; it is defined by its courses offered by the school of engineering are listed under the subject code engr on the stanford bulletins explorecourses web site the school of engineering Lyapunov Stability of Non-Autonomous Dynamical Systems (Mathematics Research Developments):

The foundation of the modern theory of stability was created in the works of A Poincare and A M Lyapunov The theory of the stability of motion has gained increasing significance in the last decade as is apparent from the large number of publications on the subject A considerable part of these works are concerned with practical problems especially problems from the area of controls and servo mechanisms and concrete problems from engineering which first gave the decis
