By Werner Haußmann : Multivariate Approximation: Recent Trends and Results the online version of computers and mathematics with applications at sciencedirect the worlds leading platform for high quality peer reviewed full text journals in statistical modeling regression analysis is a statistical process for estimating the relationships among variables it includes many techniques for modeling and Multivariate Approximation: Recent Trends and Results:

A presentation of the main results of the Second International Conference on Multivariate Approximation held in Haus Bommerholz near Witten Germany from September 29 until October 4 1996 There are contributions on the following topics interpolation and hyperinterpolation on the sphere quadrature discrepancy and spherical designs multivariate convex spline interpolation triangular finite element spaces polar form of splines refinable spline pairs local box di
