By Lev Bukovský : The Structure of the Real Line (Monografie Matematyczne) The Structure of the Real Line (Monografie Matematyczne):

The rapid development of set theory in the last fifty years mainly by obtaining plenty of independence results strongly

influenced an understanding of the structure of the real line This book is devoted to the study of the real line and its subsets taking into account the recent results of set theory Whenever possible the presentation is done without the full axiom of choice Since the book is intended to be self contained all necessary results of set theory topolo From the reviews ldquo The history of investigations of real numbers is the starting point of this monograph hellip Every chapter is supplied with a well chosen series of exercises containing interesting complementary material hellip This unique monog
