By Wieslaw A. Dudek, Valentin S. Trokhimenko : Algebras of Multiplace Functions Algebras of Multiplace Functions:

This monograph is the first one in English mathematical literature which is devoted to the theory of algebras of functions of several variables The book contains a comprehensive survey of main topics of this interesting theory In

particular the authors study the notion of Menger algebras and its generalizations in very systematic way Readers are provided with complete bibliography as well as with systematic proofs of these results
