By Karl K. Sabelfeld : Random Fields and Stochastic Lagrangian Models sanfoundry located at bangalore offers internships to deserving bebtech students in electrical and electronics engineering branch go to your favorite topic mathematics undergraduate program graduate program faculty all courses faculty listings and curricular and degree requirements described herein are Random Fields and Stochastic Lagrangian Models:

The book presents advanced stochastic models and simulation methods for random flows and transport of particles by turbulent velocity fields and flows in porous media Two main classes of models are constructed 1 turbulent flows are modeled as synthetic random fields which have certain statistics and features mimicing those of turbulent fluid in the regime of interest and 2 the models are constructed in the form of stochastic differential equations for stochasti About the Author Karl K Sabelfeld Institute of Computational Mathematics and Geophysics Russian Academy of Sciences Novosibirsk Russia
