By Jan Vries : Topological Dynamical Systems (de Gruyter Studies in Mathematics) abstract algebra akivis algebra albert penico taft theorem alexander hirschowitz theorem every homogeneous polynomial can be expressed as a sum of powers of list of the new elected members to the european academy of sciences Topological Dynamical Systems (de Gruyter Studies in Mathematics):

There is no recent elementary introduction to the theory of discrete dynamical systems that stresses the topological background of the topic This book fills this gap it deals with this theory as applied general topology We treat all important concepts needed to understand recent literature The book is addressed primarily to graduate students The prerequisites for understanding this book are modest a certain mathematical maturity and course in General Topology About the Author Jan de Vries CWI Amsterdam the Netherlands
