By Andrei-Tudor Patrascu : The Universal Coefficient Theorem and Quantum Field Theory: A Topological Guide for the Duality Seeker (Springer Theses)

buy the universal coefficient theorem and quantum field theory a topological guide for the duality seeker springer theses on the universal coefficient theorem and quantum field theory a topological guide for the duality seeker authors patrascu andrei tudor The Universal Coefficient Theorem and Quantum Field Theory: A Topological Guide for the Duality Seeker (Springer Theses):

This thesis describes a new connection between algebraic geometry topology number theory and quantum field theory It offers a pedagogical introduction to algebraic topology allowing readers to rapidly develop basic skills and it also presents original ideas to inspire new research in the quest for dualities Its ambitious goal is to construct a method based on the universal coefficient theorem for identifying new dualities connecting different domains of quantu From the Back Cover This thesis describes a new connection between algebraic geometry topology number theory and quantum field theory It offers a pedagogical introduction to algebraic topology allowing readers to rapidly develop basic skills and it als
