3 of 5 review helpful notes on local cohomology leading to etale By Bachelier Probably Alexandre Groethendieck s Groethendieck most accessible work Crudely put this is a study beginning at coboundries etc in algebraic topology and the implications of mapping in duality It expands on scheme and sheaf theory nicely although I admit this is beyond me but the implications of infinitesimal information with a function va Shipped from UK please allow 10 to 21 business days for arrival Lecture Notes in Mathematics 41 106pp Good condition ex lib
