The core of Volume nbsp 3 consists of lecture notes for seven sets of lectures Hilbert gave often in collaboration with Bernays on the foundations of mathematics between 1917 and 1926 These texts make possible for the first time a detailed reconstruction of the rapid development of Hilbert rsquo s foundational thought during this period and show the increasing dominance of the metamathematical perspective in his logical work the emergence of modern mathematical lldquo The editors have produced an impeccable and exhaustive critical edition of all of Hilbert rsquo s papers on mathematical logic and meta mathematics written between 1917 and 1931 in German hellip this volume is excellently designed for the historian
