By Radu Ioan Bot, Sorin-Mihai Grad, Gert Wanka : Duality in Vector Optimization a trust region method for solving linearly constrained locally lipschitz optimization problems the online version of european journal of operational research at sciencedirect the worlds leading platform for high quality peer Duality in Vector Optimization:

This book presents fundamentals and comprehensive results regarding duality for scalar vector and set valued optimization problems in a general setting One chapter is exclusively consecrated to the scalar and vector Wolfe and Mond Weir duality schemes From the reviews ldquo This book is dedicated to duality in vector optimization and is largely based on the contribution of the authors to this field The book is divided into 7 chapters it also contains a list of symbols and notations an index of terms a
