Summer School held in Cetraro, Italy, July 1-7, 2007 (Lecture Notes in Mathematics):

This volume collects the expanded notes of four series of lectures given on the occasion of the CIME course on Nonlinear Optimization held in Cetraro Italy from July 1 to 7 2007 The Nonlinear Optimization problem of main concern here is the problem n of determining a vector of decision variables x R that minimizes ma n mizes an objective function f middot R R when x is restricted to belong n to some feasible setF R usually described by a set of equality From the Back Cover This volume presents recent advances in continuous optimization it is authored by four well known experts in the field and presents classical as well as advanced material on currently active research areas such as the family of Sequential
