From Birkhäuser : Modern Developments in Multivariate Approximation: 5th International Conference, Witten-Bommerholz (Germany), September 2002 (International Series of Numerical Mathematics) Modern

Developments in Multivariate Approximation: 5th International Conference, Witten-Bommerholz (Germany), September 2002 (International Series of Numerical Mathematics):

This volume contains a selection of eighteen peer reviewed articles that were presented at the 5th International Conference on Multivariate Approximation held in Witten Bommerholz in September 2002 The contributions cover recent developments of constructive approximation on manifolds approximation by splines and kernels subdivision techniques and wavelet methods The main topics are applications of multivariate approximation in finance approximation
