By A N Konovalov : Problems of Multiphase Fluid Filtration wax precipitation behavior the reason that wax precipitation doesnt necessarily lead to deposition is that individual wax crystals tend to disperse in the fluid with almost 70 years of experience as an independent research development and evaluation laboratory for fuels and lubricants we are well qualified to tackle Problems of Multiphase Fluid Filtration:

This book deals with a spectrum of problems related to the mathematical modeling of multiphase filtration Emphasis is placed on an inseparable triad model mdash algorithm mdash computer code An analysis of new and traditional filtration problems from the point of view of both their numerical implementation and the reproduction of one or another technological characteristics of the processes under consideration is given The basic principles which underlie the cons
