By Ignazio Licata : Physics Of Emergence and Organization physics of emergence and organization 2007 project quantum information project 2010 vision of the laboratory for the physics of life is a biophysics research laboratory of thomas gregor at the physics department of Physics Of Emergence and Organization:

This book is a state of the art review on the Physics of Emergence The challenge of complexity is to focus on the description levels of the observer in context dependent situations Emergence is not only an heuristic approach to complexity but it also urges us to face a much deeper question what do we think is fundamental in the physical world This volume provides significant and pioneering contributions based on rigorous physical and mathematical approaches
