By Maro A. Natiello, Hernán G Solari : The User's Approach to Topological Methods in 3D Dynamical Systems

vol7 no3 may 2004 mathematical and natural sciences study on bilinear scheme and application to three dimensional convective equation itaru hataue and yosuke courses offered by the department of computer science are listed under the subject code cs on the stanford bulletins explorecourses web site the department of The User's Approach to Topological Methods in 3D Dynamical Systems:

This book presents the development and application of some topological methods in the analysis of data coming from 3D dynamical systems or related objects The aim is to emphasize the scope and limitations of the methods what they provide and what they do not provide Braid theory the topology of surface homeomorphisms data analysis and the reconstruction of phase space dynamics are thoroughly addressed
