By Toyokazu Hiramatsu, Seiken Saito : Introduction to Non-Abelian Class Field Theory, An: Automorphic Forms of Weight 1 and 2-Dimensional Galois Representations (Series on Number Theory and Its Applications)

11th august 2017 a 2 year postdoctoral research only position in the area of additive combinatorics and number theory is now available at the unsw sydney australia geometric langlands seminar this is an archive of email messages concerning the geometric langlands seminar for 2012 13 Introduction to Non-Abelian Class Field Theory, An: Automorphic Forms of Weight 1 and 2-Dimensional Galois Representations (Series on Number Theory and Its Applications):

This monograph provides a brief exposition of automorphic forms of weight 1 and their applications to arithmetic especially to Galois representations One of the outstanding problems in arithmetic is a generalization of class field theory to non abelian Galois extension of number fields In this volume we discuss some relations between this problem and cusp forms of weight 1
