By Jean-Michel Bismut, Gilles Lebeau : The Hypoelliptic Laplacian and Ray-Singer Metrics. (AM-167) (Annals of Mathematics Studies)

The Hypoelliptic Laplacian and Ray-Singer Metrics. (AM-167) (Annals of Mathematics Studies):

This book presents the analytic foundations to the theory of the hypoelliptic Laplacian. The hypoelliptic Laplacian, a second order operator acting on the cotangent bundle of a compact manifold, is supposed to interpolate between the classical Laplacian and the geodesic flow. Jean Michel Bismut and Gilles Lebeau establish the basic functional analytic properties of this operator, which is also studied from the perspective of local index theory and analytic torsion. About the Author: Jean Michel Bismut is professor of mathematics at the University of Paris Sud; Gilles Lebeau is professor of mathematics at the University of Nice Sophia Antipolis.
