seminaire rudakov london mathematical society lecture note series no 148 Helices and Vector Bundles: Seminaire Rudakov (London Mathematical Society Lecture Note Series):

This volume is devoted to the use of helices as a method for studying exceptional vector bundles an important and natural concept in algebraic geometry The work arises out of a series of seminars organised in Moscow by A N Rudakov The first article sets up the general machinery and later ones explore its use in various contexts As to be expected the approach is concrete the theory is considered for quadrics ruled surfaces K3 surfaces and P3 C Language Notes Text English translation Original Language Russian
